

## External Order PDF - Field Population Test

Purpose: Verify External Order details + Referral Contact (External Provider) population | Generated: 2026-02-19

### External Order Details

|                                                                         |                                                                                           |
|-------------------------------------------------------------------------|-------------------------------------------------------------------------------------------|
| <b>Order Type</b><br>PDF tag: externalOrderType<br><input type="text"/> | <b>Relevant Information</b><br>PDF tag: externalOrderRelevantInfo<br><input type="text"/> |
|-------------------------------------------------------------------------|-------------------------------------------------------------------------------------------|

### Referral Contact (External Provider)

|                                                                                                   |                                                                                    |
|---------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------|
| <b>External Provider First Name</b><br>PDF tag: externalProviderFirstName<br><input type="text"/> | <b>NPI</b><br>PDF tag: externalProviderNpi<br><input type="text"/>                 |
| <b>External Provider Last Name</b><br>PDF tag: externalProviderLastName<br><input type="text"/>   | <b>Email</b><br>PDF tag: externalProviderEmailAddress<br><input type="text"/>      |
| <b>External Provider Specialty</b><br>PDF tag: externalProviderSpecialty<br><input type="text"/>  | <b>Phone</b><br>PDF tag: externalProviderPhoneNumber<br><input type="text"/>       |
| <b>Practice Name</b><br>PDF tag: externalProviderPracticeName<br><input type="text"/>             | <b>Fax</b><br>PDF tag: externalProviderFaxNumber<br><input type="text"/>           |
| <b>Address Line 1</b><br>PDF tag: externalProviderAddress1<br><input type="text"/>                | <b>Address Line 2</b><br>PDF tag: externalProviderAddress2<br><input type="text"/> |
| <b>City</b><br>PDF tag: externalProviderCity<br><input type="text"/>                              | <b>State</b><br>PDF tag: externalProviderState<br><input type="text"/>             |
| <b>ZIP Code</b><br>PDF tag: externalProviderZip<br><input type="text"/>                           | <b>Notes</b><br>PDF tag: externalProviderNotes<br><input type="text"/>             |

### Acceptance Criteria (Expected Behavior)

- When a user saves an external order, the generated PDF displays Order Type, Relevant Information text, and Referral Contact information (if selected).
- When a field exists in the PDF template, the corresponding value is displayed.
- When a field does not exist in the PDF template, then the PDF still renders without errors.
- When no referral contact is selected, referral contact fields appear blank.

Template keys are AcroForm field names (e.g., externalProviderFirstName).
