

<< WLAN report >>

* Connection : Failed (Error : TS-07)

* Connection Failed.
* For details, please refer Troubleshooting in Quick Setup Guide.

*** Solution ***

The machine cannot detect a WLAN access point/router that has WPS or AOSS enabled.

If you would like to connect with WPS or AOSS, you must operate both your machine and the WLAN access point/router.
Confirm the connection method for WPS or AOSS on WLAN access point/router and try starting again.

If you do not know how to operate your WLAN access point/router using WPS or AOSS see the documentation provided with your WLAN access point/router, ask the manufacturer of your WLAN access point/router or ask your network administrator.
