

Microsoft Teams Phone for Frontline Workers

Keep your frontline workforce connected with flexible, smart, and reliable calling—all in Microsoft Teams

With Microsoft Teams Phone, frontline workers can securely communicate and collaborate through a **connected and flexible calling solution** on individual devices as well as common-area phones

Enable frontline productivity with Microsoft Teams Phone

Keep each employee mobile, connected and collaborative with dedicated numbers and devices

Route calls to the right person at the right time with auto-attendants, call queues, and call delegation

Communicate securely with patients with electronic health record application integration, call recording, and transcription

Create meaningful customer engagements with CRM system integration, consultative transfers, and call park

Set frontline teams up quickly with shared calling, allowing groups of users to make and receive calls with a shared phone number and calling plan

Use Teams Phone for individual devices to manage

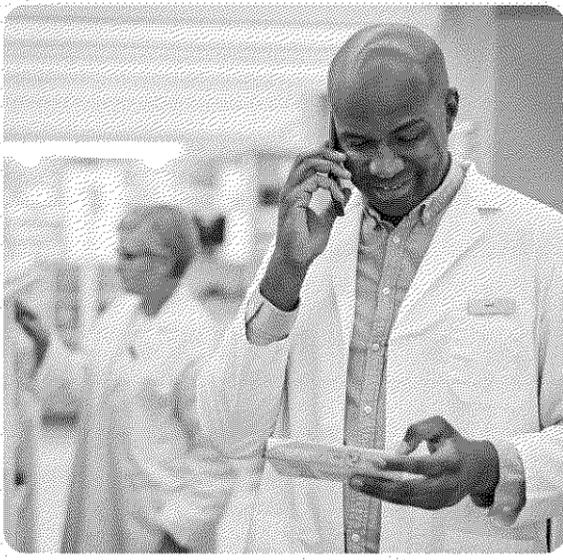

- Direct customer inquiries
- Deliveries and in-store pickups
- Medical facility coordination
- Clinician-patient consultations
- Loan services calls
- And more

How to get started

[Get your frontline connected with the Teams Phone for Frontline Workers license](#)

[Learn more about how to use Teams Phone](#)

Simplify frontline worker communication with common area phones in shared spaces

Unlock easy-to-use calling capabilities where they're needed most for employees

Route incoming calls efficiently, easily and exactly where you need them with auto-attendants, call queues, call transfer, and call park

Relay important information between teams in real time with Walkie Talkie in Teams as well as hotline phones programmed to dial one number

Use Teams Phone for shared devices to manage:

- Customer support calls
- Supply delivery intake
- Appointment scheduling
- Retail order fulfillment
- Warehouse inventory management
- And more
