

<< WLAN report >>

* Connection : Failed (Error : TS-05)

* Connection Failed.

*** Solution ***

The Network Name (SSID) and Network Key (Password) are incorrect. Check the following points and try to set up your wireless connection again:

* Confirm the Network Name (SSID) and Network Key (Password). If your Network Key contains upper-case and lower-case letters, make sure you type them correctly.

* If you cannot find the Network Name (SSID) and security information, see the documentation provided with your wireless router/access point, or contact the router manufacturer, your system administrator, or Internet service provider.

* If your wireless router/access point uses WEP encryption with multiple WEP keys, write down and use only the first WEP key.

<Configuration>

Network Name (SSID)	Olean Airport
Hardware Address (MAC)	f4:4e:b4:12:e8:4a
Communication Mode	Infrastructure
Authentication Type	WPA Personal
Encryption	TKIP+AES
Network Channel	-

<Network Search (Ch, Signal, SSID)>

1 , 5, Olean Airport
