

Important Safety Instructions

This chapter provides important safety instructions for the prevention of injury to users of this machine and others, and damage to property. Read this chapter before using the machine and follow the instructions to ensure that you use the machine properly. The Canon online manual site (<https://oip.manual.canon/>) also provides information on this machine. Read this information also to ensure correct use.

Do not perform any operations not described in this manual. Canon will not be responsible for any damages resulting from operations not described in this manual, improper use, or repairs or modifications not performed by Canon or a third party authorized by Canon. Unless otherwise stated, illustrations used in this manual are for the imageCLASS MF289dw.

WARNING

Indicates a warning concerning operations that may lead to death or serious personal injury if not performed correctly. To ensure that you use the machine safely, always observe these warnings.

CAUTION

Indicates a precaution for preventing the risk of personal injury or property damage other than a product fault due to improper use of the machine. To ensure that you use the machine safely, always observe these cautions.

IMPORTANT

Indicates important operational requirements and restrictions that should always be observed when using this machine. Always observe these important items to avoid malfunctions, faults or property damage due to improper machine operation.

Safety-related Symbols

The following symbols are used on this product:

- Power switch (On)
- Power switch (Off)
- Power switch (Stand-by)
- Push-button switch (On/Off)
- Protective earthing terminal
- Electric shock warning: Hazardous voltage inside. Do not remove the cover.
- High temperature warning: Do not touch.
- Class II equipment
- Contains moving parts. Keep hands and other body parts away from moving parts.
- Electric shock warning: Unplug all power cords from the power outlet.
- Sharp edges. Keep hands and other body parts away from sharp edges.

NOTE

Some models may use other symbols not listed here.

Installation

To ensure that you use this machine safely, read the following precautions carefully before installing the machine in a suitable location.

WARNING

Do not install in the locations listed below

Doing so may result in a fire or electric shock.

- Locations that risk blocking the ventilation slots (too close to walls or curtains or on materials such as deep-pile carpets)
- Damp or dusty locations
- Near heating appliances or open flames
- Near alcohol, paint thinners or other flammable substances

Do not use a wireless LAN close to medical equipment (only for products with a wireless LAN function)

Radio waves can interfere with medical equipment and cause malfunctions that may lead to accidents.

CAUTION

Do not install in the locations listed below

Doing so could result in a fault or adversely affect people or other equipment.

- Outdoors or in locations exposed to direct sunlight
- Locations subject to temperature and humidity extremes, whether low or high
- Locations subject to dramatic changes in temperature or humidity
- Near equipment that generates magnetic or electromagnetic waves
- Near electronic devices or precision equipment, such as TVs, radios and computers
- Laboratories or other locations where chemical reactions occur
- Locations heavily exposed to aerosol sprays, ammonia or other corrosive gases
- Locations subject to instability or vibration
- Surfaces that may warp under the weight of the machine or into which the machine is liable to sink (carpets, straw matting, beds, etc.)
- Locations where air ventilated from the machine directly impacts people

Use the correct method when moving this machine

Using incorrect methods to move this machine may result in injury.

- Carry this machine correctly according to the instructions in the manual.
- Position this machine slowly and carefully to avoid getting your hands caught between the machine and the floor or walls.

Provide adequate ventilation during use

This machine generates small amounts of ozone and other emissions during normal use. These amounts are too low to be harmful to humans. However, poorly ventilated rooms should be adequately ventilated during extended use or long print runs.

IMPORTANT

When using a wireless LAN (only for products with a wireless LAN function)

- Install the machine no more than 54 yards (50 meters) from the wireless LAN router.
- As much as possible, install in a location where communication is not blocked by intervening objects. The signal may be degraded when passing through walls or floors.
- Install the machine as far as possible from digital cordless phones, microwave ovens or other equipment that emits radio waves.

Connecting the telephone line (only for machines that support faxes)

In certain circumstances, this machine may not be able to communicate via some telephone lines or in some regions. One such example is when the total resistance of the telephone line and the machine exceeds 1700Ω. In this event, contact your dealer or service representative.

- This machine conforms to an analog telephone line standard and can only be connected to ordinary subscriber telephone lines. Connecting the machine to a business line or other dedicated line may result in faults. Always check the line before connecting.

About cables

- Use a modular cable that is shorter than 3.2 yards (3 meters).
- Use a USB cable that is shorter than 3.2 yards (3 meters).

Power Supply

WARNING

Using the power plug and cord correctly

Improper use may result in a fire or electric shock.

- Check that the power supply used for the machine is safe and has a stable voltage.
- Use only a power supply that meets the specified voltage requirements.
- Connect the machine to a securely grounded power outlet using the power cord provided.
- Do not use power cords other than the cord provided.
- The power cord provided should only be used with this machine.
- If you plug this machine into a power outlet with multiple sockets, do not use the remaining sockets to connect other devices.
- Do not use extension cords.
- Run the power cord so as to avoid any risk of tripping over the cord.
- Do not modify, pull, unduly bend or otherwise damage the power cord.
- Do not place heavy objects on the power cord.
- Do not bundle the power cord or tie it in a knot.
- Do not run the power cord close to a heating appliance.
- Do not plug in and unplug the power connector frequently.
